RAWSON'S

AUTUMN CATALOGUE

... OF ...

Bulbs, Seeds, Plants

ETC., ETC.

September 1, 1905

Growing Bulbs for either the House or the early Spring Garden is a most interesting and inexpensive pastime. With each variety of Bulb we give in this catalogue a complete cultural direction and if followed properly, success can be the only result. There is no reason why an amateur cannot produce more perfect flowers than the professional florist provided he buys but the *Choicest* quality of bulbs. In order to supply the very best that the European market offers, we have spared neither efforts nor expense and we fully believe that we can supply bulbs which are far superior to the average quality offered by other dealers. The greatest reliance may be placed upon our furnishing goods that are absolutely true to name and of extraordinary large size.

Notwithstanding the fact that we furnish the *Highest Grade* of quality our prices must be acknowledged as reasonable.

We wish to call your special attention to the many novelties we have to offer and having supplemented our list considerably, this issue will be found most interesting.

ORDERS should be sent as early as possible; by doing so you may expect the full quantity ordered. Though they may not be needed until later, they can easily be stored away in a cool place without fear of causing deterioration.

While in such cases we fill orders within a day after receipt, it is almost impossible to do so during the busy season. Most varieties of Bulbs will be ready for shipment September 15, with the exception of a few, which are specially marked and will be forwarded at time of arrival from Europe.

DELIVERY: Some bulbs we deliver free, others, the amount of postage should be added to when ordering. Each class is specified to this effect. If the distance is not too far we prefer shipping bulbs by express at buyer's expense, as goods can be packed with better protection and we shall add sufficient "Extras" to help defray the charges.

Plants can be sent by *Express only* as we furnish but a large specimen of any variety. Postal Rules confine us to a certain size of package which would compel us to pick plants of inferior quality, which would produce poor results.

PACKING: No charge is made for packing, nor for Delivery to Freight Depots or Express Offices in Boston.

REMITTANCES: We prefer cash from unknown correspondents. We ship goods C.O.D. if partial payment is enclosed with order to guarantee acceptance.

DIRECTIONS: It is most important to have your full name and address on order as plain as possible and while we exercise the utmost care in filling all orders to the entire satisfaction of the customer, an error is liable to occur at times. In such event it is our desire to be promptly notified of the fact, so we can make such corrections as will be satisfactory. Complaints if any should be made immediately upon receipt of Goods, so we can place the responsibility and correct the matter in time.

We are most anxious to have all our customers constantly satisfied and if at any time you have cause to be otherwise we would consider it a favor to be informed at once. All correspondence should be addressed direct to the firm, W. W. Rawson & Co., and it will receive prompt attention.

Disclaimer: Many of the failures with Seeds, Bulbs and Plants are due to causes entirely beyond human control, such as unfavorable weather and soil conditions, improper planting, etc., which makes it impossible for us to guarantee success, and while we exercise the greatest care to have all Seeds, Bulbs and Plants, pure, reliable and fresh we do not give any warranty, express or implied, as to description, quality or productiveness of any of the Seeds, Bulbs and Plants we send out. On those conditions only we fill orders. Of course we know it is to the best of our interest to supply but such goods as will not only grow but prove to be everything that the description calls for.

DUTCH HYACINTHS

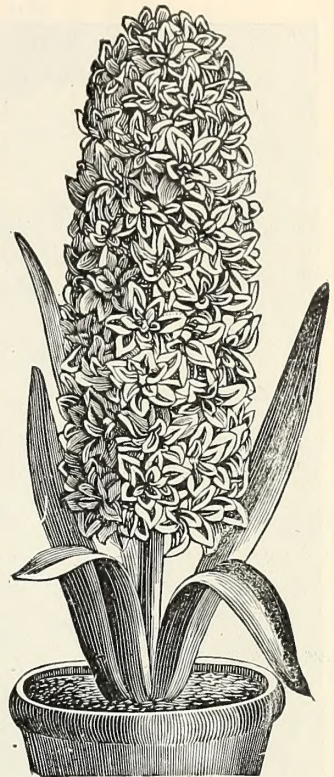

Ready for Delivery in September

Being of easy culture and possessing all the qualities of a popular flower, namely, brilliant colors, delightful fragrance, long keeping and very decorative, has caused this variety of bulbs to be used more extensively than others. Hyacinths are grown for the house in pots and glasses or out of doors in massive beds for the earliest color effect, as they precede both the Jonquil and Tulip in time of flowering. They are most desirable for perennial borders to enliven at the time when the other plants are still asleep. The proper way to plant them for this purpose is irregularly all over the bed in October, while most of the plants are still in a live condition, so as not to disturb their root growth.

GARDEN CULTURE. Plant in good pulverized garden soil, which has been previously well enriched and manured, from October till December—the earlier the better—and place the bulbs about six inches apart and six inches below the surface. Just before freezing weather sets in cover beds with dry material such as leaves, straw, litter or green pine branches, the latter preferred, to a depth of four inches. If manure is used for covering use but very little, as a quantity might heat the bulbs, which would cause injury. Do not uncover too early in spring. In this climate it is usually done at the beginning of April.

POT CULTURE. To have the best success the bulbs for this purpose should be planted very early, not later than the end of October. Care should be taken to have a composition of soil which consists of two-thirds mixture of leaf mould, manure and soil and one-third sand. Use a five inch pot for a single bulb or place four bulbs in a six inch, seven bulbs in an eight inch and twelve bulbs in a ten inch pan. Have top of bulb just above the surface. After potting give a thorough watering then place in a cool cellar or closet on a layer of coal ashes and cover entirely with ashes to a depth of three inches. They should remain in the dark for at least ten weeks and if succession of bloom is desired only a certain number of pots should be taken to the light at one time, leaving a week's interval for the next lot. When bringing the pots from the dark do not place immediately into sunlight, but gradually. Liquid Sheep Manure is an excellent food, when they show the flower spike. For Pot Culture, we recommend our Selected Named Varieties.

CULTURE IN GLASSES. Single varieties are preferable for this purpose. Place the bulb so that the base is just in contact with the water. Soft rain-water is very good and a little charcoal should be added to keep it pure. Place the glasses in a cool, dark closet for ten or twelve days until roots are formed and then expose to the air and light as much as possible. Avoid gas-light. During cold nights remove them if near a window, as the water should never freeze. Change water every two or three days. If selection is left to us, we shall select varieties that are especially well adapted for this culture.

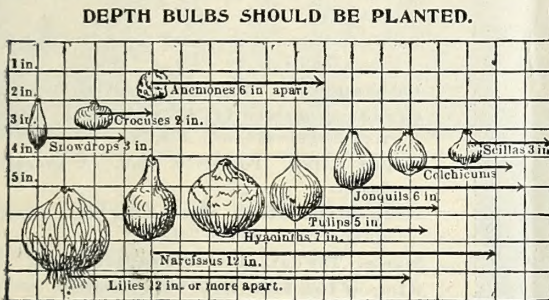

Dutch Hyacinth

RAWSON'S MIXED BEDDING HYACINTHS

FOR FORCING AND BEDDING
LARGE UNNAMED VARIETIES
IN SEPARATE COLORS

Our mixed Hyacinths are of the largest size and should not be compared with cheap mixtures offered elsewhere. The variety of colors we offer is so extensive that beautiful effects may be produced with them. Great care has been given to the selection of varieties used for each mixture so as to produce their flowers all at one time and at the same height.

To answer the many inquiries regarding the planting of bulbs, the above chart has been carefully prepared to illustrate not only the depth but distance apart the bulbs should be planted.

RAWSON'S

"FIRST - PRIZE"

Exhibition Hyacinths

COLOSSAL BULBS

These Should Produce Specimen Flowers.

For Exhibition Purpose Single
Varieties Are Preferred.

Our selection consists of single varieties only.

Gertrude. Handsome rose pink, excellent flower.

Moreno. Delicate waxy pink, giant spike.

Dr. Westerman. A new variety of a beautiful dark red color.

Jaques. Bright rose, the largest flower of this shade.

La Grandesse. Purest white, splendid bells and grand spike.

La Franchise. Creamy white, extra fine.

Grandeur a Merveille. Fine blush white, very large, well-formed spike.

Grand Lilas. Porcelain blue. A graceful flower.

King of the Blues. Rich dark blue, superb spike with immense bells.

Marie. The darkest blue, compact spike.

King of the Yellows. Pure yellow.

Each, 20 cts. Doz., \$2.00 100 \$15.00

These can be shipped by express only

THREE ENTIRELY NEW VARIETIES OF EXCEPTIONAL MERITS

Dr. Westerman. An immense flower of a most beautiful dark red shade.

Princess of Wales. Purest white of giant type; though massive it is very graceful.

Lord Beaconsfield. Clear light blue, a delicate and pleasant shade. The actual color of this variety has not been known among Hyacinths.

Each, 20 cts. Doz., \$2.00 100, \$15.00

If wanted by Mail add 15 cts. per Dozen for Postage. Single Bulbs mailed free.

RAWSON'S "MINIATURE" or "BABY" HYACINTHS

These are just the proper thing for the shallow bulb pan or fern dish; they are most attractive, pleasing and graceful.

EARLY ROMAN HYACINTHS

This beautiful and valuable variety, if planted early in September and gently forced, will bloom in November, or their flowering may be retarded until Christmas by keeping them in a cool place. By successive plantings they may be had in bloom until March. The flowers, which are smaller than the ordinary hyacinth, are produced in great profusion, each bulb throwing up three or four spikes of delicate scent. For a good effect, five bulbs should be planted in a 6-in. pot.

	Doz.	100	1000
Pure White. Extra large selected bulbs.....	\$0.60	\$4.00	\$35.00
Pure White. Mammoth bulbs.....	.75	6.00	50.00
" " Monstrous bulbs.....	1.00	8.00	75.00

The latter size is the largest that has ever been sent to this country.

Light Pink.60	4.00	35.00
Light Blue.50	3.50	30.00
Yellow. Rather new and a very good color.....	1.00	8.00	75.00
White Italian or Parisian.60	4.00	35.00

These are about two weeks later than the Roman hyacinths and the blossoms somewhat larger. Very fragrant and decorative.

If wanted by mail add 10 cents per dozen for postage

SINGLE EARLY TULIPS

No other flower excels the Tulip in beauty of form, brilliancy of color, effective bedding and gorgeous show. They are equally desirable for bedding as well as for pot culture in-doors. For out-door bedding the most brilliant effect can be produced by massing colors which contrast well. Our list of named varieties is the most complete in this country, especial care being taken to offer but the choicest sorts. All our bulbs have been picked and should prove of superior size and quality.

CULTURE

The pot culture is the same as with Hyacinths, with the exception that from 8 to 12 bulbs should be planted in one pan in order to produce the proper effect. Pit-storage instead of cold cellar after being potted is preferable. A pit should be dug 3 feet deep, 3 feet wide, and as long as is necessary to hold the amount of pots. Fill bottom of pit with a layer of 6 inches of coal ashes, place filled pots or pans upon ashes and cover with the same material for another 6 inches, fill in balance of pit with soil and cover surface with a good heap of manure. While the bulbs will be perfectly cold and in their natural home, they will not freeze if sufficient manure is used on surface. They can be removed from there any day during the winter, 10 to 12 weeks being necessary to root them well. Being placed near a sunny window in a warm room, the flowers can be produced within 30 days.

For out-door bedding, bulbs should be planted 4 inches apart and 4 inches deep; a little sand should be placed underneath each bulb where beds are composed of heavy loam. Beds should be raised to preserve the bulbs. Any of the varieties we list are equally well adapted for forcing as well as bedding. For borders we recommend our mixtures. Cover for protection same as Hyacinths.

RAWSON'S

ARLINGTON PRIZE MIXTURE

We pride ourselves in offering the choicest mixture of Tulips in this country. Over 250 of the choicest sorts of Tulips are used to produce this blending. We give great study to the selecting of varieties that will flower at the same time and grow of even height, in order to produce the most brilliant mass effect. We use but the largest bulbs for this mixture, which is undoubtedly unsurpassed.

LATE FLOWERING SINGLE TULIPS

This class of Tulips, while being one of the best for out-door culture is hardly known in this country, and it would be well for every American gardener to become acquainted with this most valuable flower. This species flowers from the latter part of May until well into June and thus lengthens the season; furthermore, it is absolutely hardy and has the excellent quality of increasing in this climate, which no other Tulip has. Most of the varieties listed below have stems from 15 to 36 inches in height, which are surrounded by foliage of extraordinary robust growth. Most all of the flowers are of giant type, brilliantly colored and peculiarly egg shaped. They seldom open, thus keeping their beauty and grace undisturbed. They are especially well adapted, in fact at their best, if they are planted as clumps between shrubberies, in the perennial border or naturalized on the outskirts of woods. Our list of varieties is most complete.

	Doz.	100	1000
Breeders. A mixture of self colors, such as scarlet, crimson, violet, etc., with white base.....	\$0.30	\$2.00	\$15.00

RAWSON'S DARWIN TULIPS

Darwin Tulips

This class is comparatively new and undoubtedly the best of the late flowering Tulips. The cut on this page will hardly give the reader a fair idea of the grandeur and beauty of our Darwins. These tulips grow from 24 to 36 inches high; the flowers are borne on strong, stiff stems and are resplendent in some of the finest shades known among flowers. They are excellent for cutting, and when arranged artistically will surpass any vase of American Beauty Roses. They are perfectly hardy and being of such tall growth are just what is wanted for groups among shrubbery. Too much cannot be said in favor of this handsome class and they should be in every garden.

Most of the varieties we list are entirely new and have never been offered before.

	Doz.	100
Clara Butt. Soft, delicate, pale salmon rose.....	\$2.50	\$20.00
Flambeau. Brilliant scarlet, blue centre.....	1.25	8.00

CROCUSES

"The Heralds of Spring"

No one appreciates the Crocus more than the one who waits patiently all winter for the first signs of spring. Hardly has the snow gone when these beautiful little flowers appear above the ground and decorate our lawns and borders in their gorgeous colors. Their proper place is in the lawn where they should be planted thickly about three inches deep during month of October. If planted in clumps of one solid color they are most effective. They are very satisfactory for pot culture. For this purpose not less than twelve bulbs should be planted in one pot and the named varieties are preferable. Treat the same as tulips.

Crocus

Golden Yellow. Extra large bulbs. Pure yellow.....	Doz.	100	1000
Cloth of Gold. Yellow striped maroon.....	\$0.20	\$1.00	\$7.50
		.10	.50 4.00

FALL FLOWERING CROCUS

A class of excellent value; if planted at once will flower within six weeks after time of planting. The flowers appear in cluster during the latter part of October, while the foliage, which is quite large and decorative, appears in spring. They are most effective if naturalized among shrubs, in lawns and borders.

Large Trumpet Narcissus

Single Narcissus

Popularly Called "Jonquills" or "Daffodils"

The demand for this charming spring flower has been increasing so steadily that the European growers have devoted a greater space to them and they are cultivated so largely now that we are able to offer some of the finest varieties at a very moderate price. Our bulbs are all handpicked, thus insuring the purchaser of a larger flower.

POT CULTURE: Use same composition of soil as Hyacinths. Do not plant less than 6 bulbs of any one variety in a pan: being quicker to root, they may be taken from the dark after a period of 8 weeks. Best success may be had from bulbs that are planted during October. It is of very easy cultivation.

OUTDOOR CULTURE: Being absolutely hardy, it lends itself to a great many uses. You may plant them in massive open beds; for such purpose set bulbs 4 to 5 inches deep and from 4 to 6 inches apart, according to the size of the bulb. They prefer a sheltered place, where heavy winds do not molest them. Their best and most suitable place should be in the grass plots, or in the border of hardy plants, or along the edges of shrubby beds. In any place they look charming and attractive.

LARGE TRUMPET VARIETIES

Albicans (Spanish daffodils). Sulphur white trumpet.....	Doz.	100

NARCISSUS POETAZ HYBRIDS

(N. Poeticus Ornatus x N. Polyanthus Varieties)

ENTIRELY NEW

By crossing these two classes, Narcissus Poeticus Ornatus being the seed parent, our growers have succeeded in obtaining a perfectly hardy strain of bunch-flowered Narcissus.

The individual flowers have all more or less the Poeticus shape and size. Besides being hardy this class has the merit that they have not inherited the strong, disagreeable scent of the Tazetta Narcissus. They are equally valuable for bedding and forcing. A bed of these Narcissus is simply covered by a dense mass of flowers. They force extremely easy. This is an entirely new strain and has no similarity with varieties of Narcissus known heretofore. This class was awarded the "Award of Merit" of the Royal Horticultural Society in London, April 19, 1904.

Alsace. Petals pure white, with yellow eye; when bursting into flower the eye is slightly edged reddish. Broad large flower of true Poet form, one of the earliest. Has three flowers on a stem.....	Each	Doz.	100	
	\$0.20	\$2.00	\$15.00	
Elvira. Pure white with yellow eye, large flower of a remarkable good substance, long stemmed and a good keeper, four flowers on a stem, highly recommended.....	.10	1.00	7.50	
Irene. Perianth silky sulphur yellow, changing to light yellow, orange eye, large broad truss bearing eight to nine flowers, most pleasing color.....	.25	2.50	18.00	
Klondyke. Perianth yellow, with deep golden yellow eye, one of the deepest yellow. Trusses bear six to seven flowers.....	Each	Doz.	100	
	\$0.15	\$1.50	\$12.00	
Louise. Perianth pure white, with yellow eye, true Poeticus form, large flowers, borne on a very tall stem, grows 24 inches high, four flowers on a stem.....	.20	2.00	15.00	
Triumph. Pure white perianth, with deep yellow eye, the largest flowers of this section, resembling Bazelman Major of the Polyanthus varieties, four flowers on a stem, a sterling novelty.....	.35	3.50	25.00

POLYANTHUS NARCISSUS

One of the most popular flowers for window culture. If started during September they can easily be forced into flower for Christmas. Prepare and pot in same manner as Hyacinths. It requires from 4 to 6 bulbs to fill a 6-inch pan. Six weeks is all that is necessary for them to remain in the dark. They do splendidly if grown after the fashion of Chinese Lilies in water and pebbles.

Polyanthus Narcissus

Paper White. Early large flowering. The earliest, largest and most popular of all varieties. Pure white in enormous clusters	Doz.	100	1000

Chinese Sacred Narcissus

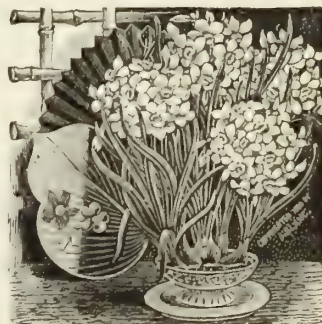

(Chinese New Year Lily)

READY IN OCTOBER

They are somewhat similar to the Polyanthus Narcissus and are usually grown in bowls partially filled with pebbles and water. If grown in this fashion they should be started in full light and draughts should be avoided. A little charcoal added to the water will keep it constantly sweet. They can also be grown successfully in pots of soil. Our importation of this bulb is very large, as we make a specialty of keeping them until late into the season, as most of our customers wish to renew their bulbs after the first planting has come into bloom. We offer sound, mammoth bulbs

Each, 10 cts. Doz., \$1.00 Per 100, \$6.00

Double Narcissus. Von Sion

AMARYLLIS

READY IN NOVEMBER

In order to obtain fine specimens the following methods should be followed: On receipt of the bulbs in the autumn they should be placed where they will be always slightly moist and warm, under the benches of a greenhouse, for example; do not pot up the bulbs before the flower buds appear. When just potted give very little water and promote growth by giving moderate bottom heat, increase the supply of water as the plants progress. Very often the mistake is made, that bulbs are potted up too early, the consequence is that only leaf growth is made. The proper soil for Amaryllis is turfy loam enriched with rotten manure.

	Each Doz.		Each Doz.

CAMASSEEA ESCULENTA

An attractive hardy spring flower, resembling Scilla Campanulata. Dark blue flowers.....

.20	1.00
-----	------

Mailed Free

One of the most popular spring flowers in France, for it is unsurpassed in brilliancy of color and profusion of bloom. Only within recent years has the American florist recognized the value of this flower and now they are grown here, we may say by the million. They are equally well cultivated in pots as well as out of doors. For the latter purpose plant 4 inches apart, 3 inches deep and protect with leaves, which should not be removed until beginning of May. If succession of blooms are desired another lot may be planted in May out of door.

For pot culture plant in November, 6 bulbs in a 6 inch pot, one inch deep and keep in cold cellar, covered with coal ashes until middle of March, when they may be brought to the window to bloom.

Gladiolus "Blushing Bride"

MR. W. W. RAWSON,

12 & 13 Faneuil Hall Sq., Boston, Mass.

Dear Sir,—I received from you late last fall about five dozen Gladioli bulbs, named Blushing Bride. They force well, and the flowers are of a very pleasing color. We like them so well and they are so much admired, that I wish you to send me five hundred bulbs when you receive your importation, and oblige

Yours truly,

W. W. RAWSON & Co.

Gentlemen,—The Gladiolus "Blushing Bride," which you sent on trial did remarkably well and would say that it is the best Gladioli today for forcing. I would like to leave my order for five hundred bulbs for fall delivery.

Yours very truly,

DAVID WIER, Supt.

TO MRS. E. D. BRANDEGEE.

Warren St., BROOKLINE, MASS., July 31, 1905.

WM. THATCHER, Gard.

TO MRS. JOHN L. GARDNER.

Verdicts such as these, coming from expert gardeners such as the above, should be conclusive.

OUR LIST OF VARIETIES OF THIS BEAUTIFUL CLASS COMPRISES

FREESIA

With right this is the most popular of all winter flowering bulbous plants, for no other flower excels it in sweetness of fragrance, grace of appearance, and ease of culture. It is too well known to require a great deal of description.

From 10 to 12 bulbs should be used for a 6-inch pot or pan, placing them $\frac{1}{4}$ inch beneath the surface. Use same composition of soil as for Hyacinths. They do not require a dark place for rooting, but should be placed immediately into light and heat. If started early they can be had in bloom by Christmas. Small thin branched twigs should be placed along the outer edge of the pot to hold up the foliage which is tall and fine and apt to break if allowed to grow without aid.

IRIS KAEMPFERI

(JAPAN IRIS)

To produce best results these should be planted in moist, rich situations. September is the ideal month for planting these and then you may be sure of getting flowers next season. The roots we offer were imported from Japan two years ago and have been allowed to flower in our nursery to ascertain their being true to name.

We offer large size clumps, not to be compared with direct importations. Names being not recognizable, we have substituted numbers.

- No. 1. Magnificent pure white variety, three petals, very large.
- " 3. Three large petals, whitish blue ground, prominently veined purple and white around margin; minor petals distinctly magenta, margined white.
- " 6. Three petals, lilac on whitish ground, veined prominently magenta, margined deeper. Vein bluish around yellow base, minor petals margined narrowly white.
- " 8. Three petals, deep lilac, veined rich blue, margined narrowly white. Rosy lilac around yellow base; minor petals rich purple, margined narrowly white.
- " 9. Six petals, purple, whitish in centre, broadly veined white not extending to margin; minor petals white, tipped lavender.
- " 10. Six petals, clear carmine, whitish in centre and veined broadly white, not extending to margin; minor petals white, tipped lilac.
- " 12. Six petals, pure white, quite large.
- " 13. Three petals, bluish lilac, prominently veined crimson, rather bluish flaked in centre and turning to rosy lilac near margin; minor petals lilac.
- " 14. Six petals, clear light blue on whitish ground, veined rich purple, flaked deeper around margin; minor petals purple.
- " 17. Three petals, rich purple veined bluish. Very glossy yellow base, very distinct. Lilac minor petals lighter in midrib.
- " 20. Six petals, clear purple, veined bluish, middle vein most prominent; minor petals purple, with prominent white midrib.
- " 21. Three petals, white, veined blue, changing to crimson near margin; minor petals lilac, narrowly margined white.
- " 22. Three petals, a delicate reddish lavender, flaked on whitish ground, margined and veined lavender; minor petals white margined and tipped lavender.
- " 23. Three petals, purplish magenta, broadly veined whitish not extending to margin. Centre and margin a clear purple; minor petals lavender with white midrib.
- " 27. Six petals, pure white. Very large and distinctly ruffled; minor petals white and fringed at tips.

Japanese Iris

- No. 28. Six petals, white and rosy carmine, veined carmine, changing to lavender near margin. White margin and base with distinct carmine zone in centre of petal; minor petals splashed lavender.
- " 30. Six petals, purple veined bluish; outside minor petals purple with white midrib; inside minor petals white, tipped lavender.
- " 31. Six petals, reddish lilac, splashed and blotched white. Distinctly blue around yellow base; minor petals lavender.
- " 32. Three petals, white ground, flaked blue, purple veins; minor petals lilac, margined white and lavender, tipped white.
- " 34. Six petals, rich blue, prominently veined white, not extending to margin; minor petals white, tipped lavender.

LILIES

Forcing Varieties

For this purpose the bulbs should be potted from August onward in a compost of equal parts turfy loam, leaf mould, rotten cow manure and sand. Start in small pots, in which they should remain till started, eight inches or more; then they should be transferred to larger pots in which you want them to bloom. Care should be taken while transferring from one pot to another not to disturb the roots or loosen any soil around them and setting them deeper than in the previous pot. This keeps the soil sweet and healthy and enables the roots forming at the base of stem to become feeders, greatly increasing the number and size of the blossoms.

Ready in October

Lilium Candidum

(Ascension or Madonna Lily)

These are the famous bulbs from Northern France, and although they can be successfully forced, they are far better for the open garden. They should absolutely be in the ground by end of September if flowers are expected the first season. Plant bulbs on their side instead of erect, from 6 to 8 inches deep, so as to prevent rain settling between the leaflets of the bulbs and eventually causing decay.

Our bulbs are of enormous size and should not be compared with inferior quality offered elsewhere.

Each 10 cts.; Doz., \$1.00;

100 \$7.00

Lilies Mailed at Single Rate Only

NOTE. We furnish 6 Bulbs at Dozen Rate, 25 at 100 Rate, 250 at 1000 Rate

HARDY LILIES

These Lilies are becoming very popular within late years and are used extensively to produce a second flowering season in beds, which usually look bare after June, such as Pæonies, Iris, Roses, Shrubs, etc. Care should be taken in selecting varieties that grow quite tall and bulbs should be planted from 10 to 15 inches deep. These lilies are all grown in our nursery and ready for delivery after September 15. Usually, importation of lily bulbs arrive so late in the season, that they cannot be planted successfully.

LILY OF THE VALLEY

(Convallaria Majalis)

READY IN NOVEMBER

Lily of the Valley

Too universally known to require description. They may be had in bloom 20 days after being potted. For pot purpose plant 12 in a 6-inch pot filled with sandy soil, allowing part of pips to protrude through the surface. Cover pot with moss to a depth of $\frac{1}{2}$ to 2 inches. Place in dark but warm place and keep moist until growth appears above moss, then remove to a light and warm spot and keep constantly watered.

For out-door culture a shady and sandy spot is preferred. Plant pips 6 inches apart and 3 inches deep and protect with leaves during winter.

Montbretias

READY IN NOVEMBER

A graceful hardy border plant which is highly prized and extensively used as an enlivener of shrubby borders. In appearance it resembles a miniature Gladiolus with bright open flowers of lasting quality.

To produce proper effects from 25 to 50 bulbs of one variety should be planted in clumps between low growing shrubs or in front of tall growing species. These are perfectly hardy and require but little protection.

PAEONIES

The best time in the year to transplant this beautiful flower is in September. Care should be taken to select a rich sunny place. The tip of the crown should be 6 inches underneath the surface, not lower.

Named Varieties of PAEONY SINENSIS

Price of Paeonies: Any of the following 35 cts. each; \$3.50 per doz. Set of 10 varieties for \$3.00.

Anemoneflora Rubra. Dark carmine red.

Candidissima. The peer of all the whites. Large flower of superb form and double. Color pure white.

Festiva Alba. A superb white variety.

Rubra Grandiflora. Handsome deep red flower.

Isabelle Karlitzky. A large anemone-shaped flower. Color a bright glowing rose.

Louis Van Houtte. A deep dark red, one of the choicest of its color. Flower of excellent size.

Lutellana. Light rose with salmon centre.

Madame Chaumay. Color a satiny rose, flower large and finely formed.

Pulcherrima. A very delicate shade of creamy white and one of the most beautiful.

Victoria. A magnificent satiny white variety with large flowers of superb form.

PAEONIES IN COLORS

We have a fine assortment of Paeonies in separate colors which we offer as follows:

Double in Shades of Red.

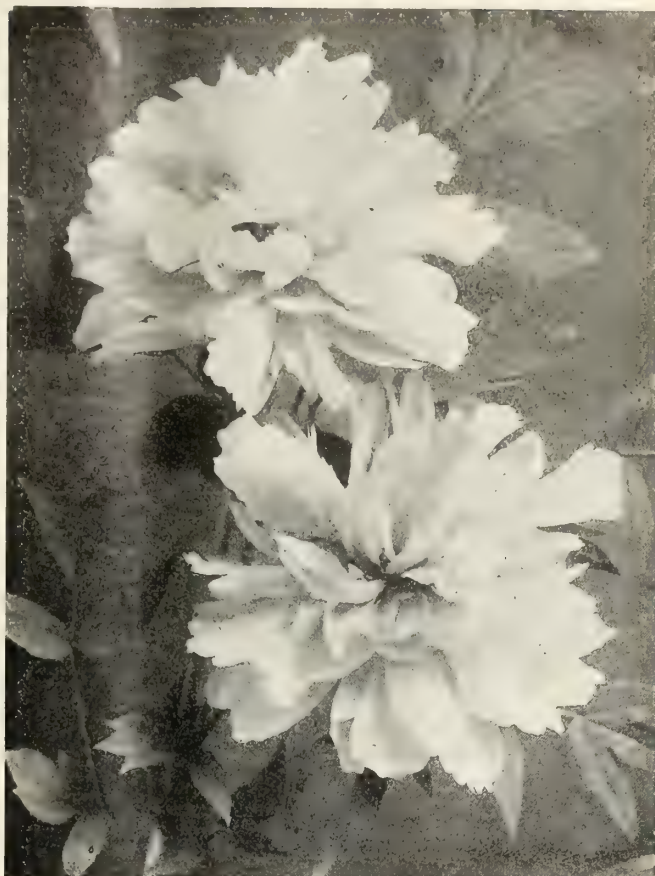

Double in Shades of Pink.

Double in Shades of White.

Paeonia Officialis Rubra. The old-fashioned deep red Paeony. Very large, double and quite fragrant.

Can be Shipped by Express Only

25 Cents Each; \$2.50 per Dozen

Double Paeony

RANUNCULUS

An exquisite dwarf spring flower, which can easily be grown in pots or in cold frames. For the former plant 8 bulbs in a 6 inch pan and treat the same as tulips with the exception that they should not be taken to the house until March. The colors are most brilliant and include such rich shades as white, yellow, crimson, purple, scarlet and black. If wanted in masses for cut flowers they should be planted in cold frames 3 inches deep and 4 inches apart and well covered until beginning of March. Then remove all coverings and put on sash. During cold nights sash should be protected with matings and boards.

SAUROMATUM GUTTATUM

"MONARCH OF THE EAST"

Produces Out of the Dry Bulb Without Water or Soil a Beautiful Colored Flower Spathe, 16 in. Long

A highly remarkable, beautiful, bulbous flower, attracting immediate attention. The only treatment required is to simply place the large, flat, round bulb on a table or shelf in a warm room or greenhouse, very soon the bulb begins to show a head and within a few weeks (sometimes after 8 to 10 days) according to season and temperature, a curiously formed flower 16 or 18 inches long develops. The flowers which are spotted dark red on yellowish orange-red ground are entirely different from any other as to coloring and shape.

After flowering, this bulb should be planted in the open ground, where it then throws up elegant, dark green, wide expanded foliage, which itself forms a fine subject in the garden, particularly when planted in May in a moist and sheltered place.

Very Large Flowering Bulbs, Each 15 Cents, Dozen, \$1.50

NOTE. We Furnish 6 Bulbs at Dozen Rate, 25 at 100 Rate, 250 at 1000 Rate

SPIREA

READY IN NOVEMBER

Spirea Japonica

The varieties we list below may either be grown as Hardy Perennials out of door or as a spring flowering pot plant. They are most decorative, bearing immense panicles of pure white feathery flowers which rise high above a delicate but rich green foliage. They are sold in enormous quantities by florists for an Easter plant.

Each Doz. 100

Japonica. One of the best and oldest varieties. Flowering stems 18 inches high, which are completely covered with white flowers..... \$0.10 \$1.00 \$6.00

TROPAEOLUM

A most beautiful pot climber of extreme easy cultivation. Plant 6 bulbs in a 6-inch pot, covering bulbs an inch with soil. Place pot in a sunny window and as growth appears supply a small stake 18 inches high for each bulb. After a few inches of growth the plants will change their individual support until the stakes are completely covered with a most delicate, gracefully cut foliage. The flowers appear towards spring, are tiny, cigarette shaped and beautifully colored.

Jarratti. Scarlet, yellow and black. Ea., \$0.10; doz., \$1.00

Iris Germanica Naturalized in the Border

BULBS FOR THE NATURAL GARDEN

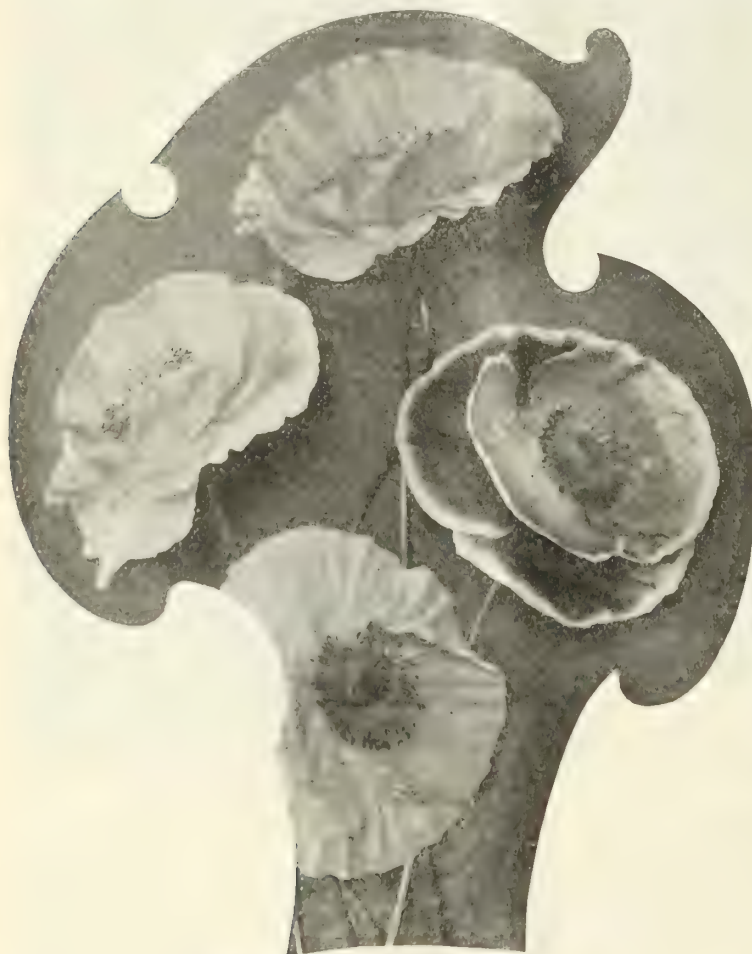

Considering the enormous amount of gardening that is done at present in this country, it is most surprising how little study the average amateur gives to creating beautiful effects in the small place he calls his garden. To accomplish this it is not essential to employ the expensive assistance of a landscape architect, nor to waste hours upon hours in reading dry literature, but merely take a stroll out into the wild uncultivated country, perhaps along a road which is banked on either side with wild wood growth and observe how nature has produced a pleasing sight here and there. With the first warm rays of the March sun, provided the snow has disappeared, appear upon the scene large and small flowers; these go and new ones come and the picture continuously changes until snow again spreads its carpet upon everything. Picture the shrubbery in your garden as the woods and plant between and in front of them such plants as are perfectly hardy, that will remain and increase there, and arrange them so that a succession of blooms will appear all over the bed the entire season. Certain varieties of bulbs are absolutely necessary to accomplish this, and in order to assist the customer we have drawn out a list that is especially recommended for this purpose. Description of each variety will be found on other pages of this catalogue.

HARDY ROSES FOR FALL PLANTING

READY FOR DELIVERY ABOUT OCTOBER 15

The BOSTON COLLECTION

12 CHOICE HARDY ROSES

Price for extra strong 2-year-old plants, 30 cts. each; \$3.00 per doz.; \$20.00 per 100; or the set of 12 for \$3.00.

Baroness Rothschild. Very beautiful pale rose.
General Jacqueminot. A rich crimson scarlet, simply a mass of bloom when at its best.

John Hopper. Color is a bright rose, the reverse of the petals being a pale lilac.

La France. Flowers large and beautiful either in bud form or when expanded; peach-blossom color, shaded pink and silvery rose.

Mabel Morrison. Unsurpassed as a white hardy rose. Color almost pure white.

Mme. Gabriel Luizet. Light silvery pink; grand flower; free bloomer; fragrant.

Magna Charta. Prized on account of its magnificent bloom. The color is beautiful bright pink.

Margaret Dickson. White, with pale flesh centre; petals very large and of great substance.

Monsieur Boncenne. Another popular old rose of a velvety blackish crimson.

Mrs. John Laing. Soft pink; large, fine form; a good grower; abundant bloomer late in the season.

Paul Neyron. The largest flowered in cultivation and one of the most prolific bloomers; color deep clear rose.

Ulrich Brunner. Cherry crimson; large size; fine form; effective in the garden or for exhibition.

Ulrich Brunner

RAMBLER ROSES

Baby Rambler, a Wonderful New Rose

One of the most valuable acquisitions in recent years. It is practically the famous crimson Rambler in a dwarf form. Price: Strong field-grown plants, 75 cts. each; \$7.50 per doz.

Dorothy Perkins. Countless clusters of double pink flowers. Strong selected dormant plants, 50 cts. each; \$5 per doz.

Crimson Rambler. The finest climbing rose in existence. Unequalled for hardiness, vigor of growth, profusion of bloom and brilliancy of color. Extra strong 2-year-old plants, 50 cts. each; \$5 per doz.

Yellow Rambler. Of similar habit to the Crimson Rambler. Flowers are very double, of a decided yellow and very sweetly scented. Extra strong 2-year-old field-grown plants, 40 cts. each; \$4 doz.

Mrs. J. Laing

STANDARD LIST OF

True English Sweet Briar. Valued for the fragrance of its leaves. 30 cts. each; \$3.00 per doz.

Rose Carolina (Swamp Rose). A tall-growing single pink rose. 25 cts. each; \$2.50 per doz.; \$18.00 per 100.

Carmine Pillar. Single flower, very bright rosy carmine. 40 cts. each; \$4.00 per doz.

HARDY PERENNIALS

FOR FALL PLANTING

No class of plants enjoy greater popularity at the present time than the Hardy Perennials. They have made rapid strides into public favor the past few years until now they may be considered to have a prominent and permanent place in our American gardens. They have for many years been greatly in demand in European countries and everywhere have given the best of satisfaction. According to the modern idea of landscape gardening the ideal garden is not one whose beds are laid out on geometric lines, but rather one where there is a closer resemblance to nature, and this can best be effected by the use of perennials giving a great range of color and at the same time a continuity of bloom throughout the season.

RAWSON'S COLLECTION—12 SELECT PERENNIALS

The twelve hardy perennials listed below are those we have selected as being the most satisfactory of this class. The collection embraces nearly every color and ensures a continuity of bloom from spring to late fall. To place this choice collection within easy reach of all our customers, we make the following special offer:

Any One of the Following, 15 Cents Each; \$1.50 per Dozen. Complete Set of 12 for \$1.50

Achillea, "The Pearl." Flowers pure white, double. June to September. 2½ feet.

Aquilegia Chrysantha. Flowers are a pure golden yellow with extra long spurs. Very fragrant. Flowers from May to August. Height 3 feet.

Asclepias Tuberosa. The Butterfly Milkweed. One of the finest perennials. Flowers are bright orange and are borne in immense heads. June and July. 2½ feet.

Coreopsis Lanceolata. A superb variety for cutting. Flowers are golden yellow and fully 3 inches in diameter. Wonderfully profuse bloomer, lasting from June till frost. Perfectly hardy. 2½ feet high.

Delphinium Formosum. Flowers are deep blue, having a white eye, and are produced in long spikes. Blooms most of summer. Height about 4 feet.

Digitalis Gloxiniflora Rose. Beautiful shade of pink Foxglove. 2 to 3 feet. June and July.

Gaillardia Grandiflora. One of the most brilliant perennials. Centre of flower dark maroon with red and yellow ray flowers. 3 feet. June to frost.

Lychnis Haageana. Very brilliant orange scarlet flowers nearly 2 inches across. Height 1 to 1½ feet. July and August.

Phlox, Hardy Boule de Feu. Bright vivid scarlet variety. July to frost. 3 to 4 feet.

Rudbeckia, Golden Glow. Often attaining a height of 6 feet. Marvellous continuity of double yellow bloom beginning in spring and lasting till late in the fall.

Veronica Spicata. Long spikes of small blue flowers. Blooms through June, July and August. Very popular in old-fashioned gardens. 2 feet.

Wahlenbergia Grandiflora (Campanula Grandiflora). Bell shaped flowers of a pretty blue shade. In bloom from July to September. 1½ feet.

HARDY ANEMONES JAPANESE VARIETIES

Price. Any one variety 15 cts. each; \$1.50 per doz.; \$10.00 per 100. Set of 4 varieties for 50 cts.

Japonica Rosea. Beautiful pink with yellow centre. Blooms freely. Flowers produced on long stems.

Japonica Alba. Pure white. Flowers large with prominent yellow stamens.

Japonica Whirlwind. The flowers, which are 2½ to 3 inches across, have several rows of pure white petals.

Japonica Rubra. A handsome red variety of above with same habit and character of flowers.

HARDY ASTERS

One of our most profuse flowering hardy perennials and rank among the showiest of our herbaceous plants. All are quite hardy and very graceful in habit. The color of the flowers has the widest range, combining all shades of white, red, blue and purple.

Price of varieties, 15 cts. each; \$1.50 per doz.; \$10.00 per 100. Set of 12 varieties for \$1.50.

Combe Fishacre. A very pale lavender. 2 ft.

Grace. Large bluish lavender.

Isabel. Pale blue. 3 feet.

John Wood. White shaded pink.

Lady Trevellan. Large pure white flowers. 3 to 4 feet.

Longifolia Formosissima. Dense head of rosy purple flowers. 3 feet.

Madonna. The best late pure white. Very large flowers. 3 feet.

Novae Angliae. (New England Aster.) Violet purple large flowers. 4 feet.

Novae Angliae Rosus. Rosy crimson. 3 to 4 feet.

Novelty. Deep pink. 3 feet.

Pulcherrima. A handsome violet blue with very large flowers. Late. 2 ft.

T. S. Ware. Very dense head of most delicate flowers, blooming late. 3 to 4 feet.

Delphinium Formosum

HOLLYHOCKS—RAWSON'S PRIZE DOUBLE

Double Hollyhock

HARDY POMPON CHRYSANTHEMUM

Those varieties marked L have large or aster-like flowers, and are best for decorating or bunching. Those marked S are the small or button-flowered sorts and are especially adapted for bedding or pot plants.

Golden Pheasant. S. Deep orange yellow.
Goldfinch. S. Golden yellow, shaded crimson.
James Boon. S. The best pure white button variety.
Leo. S. Pure golden yellow. Flowers very small and double.
Lyndhurst. L. A fine scarlet maroon.
Prince of Wales. L. Large pure white flowers.
Rhoda. S. Pink shaded white.
Ruby Queen. L. Handsome dark ruby red.
Surprise. L. Clear lilac shade. Quite distinct.

DELPHINIUMS

- Chinense Album.** A pure white larkspur bearing flowers in open heads. Grows about 3 feet high and is in bloom most of the summer. 15 cts. each; \$1.50 per doz.
Elatum (Bee Larkspur). Very dark blue flowers in extra long spikes, 5 to 6 feet high. Each 15 cts.; doz., \$1.50.
Formosum. The most popular and the best of the Larkspurs. Flowers are deep blue, having a white eye, and are produced in long spikes. Quite hardy and of very easy culture. Blooms most of summer. Height about 4 feet. 15 cts. each; \$1.50 per doz.
Formosum Celestinum. Similar to Formosum but light sky blue in color. Very beautiful. 15 cts. each; \$1.50 per doz.

POPPY PERENNIAL

Ice Land Poppy (Nudicaule)

Yellow, White, Scarlet. 15 cts. each; \$1.50 per doz.

ORIENTAL POPPY

Oriente. The well-known and popular Oriental Poppy. The flowers are a bright scarlet, with a black blotch at the base of the petals, and bloom in the spring. 15 cts. each; \$1.50 per doz.

This strain we select ourselves and without doubt is the equal of any other in range of color, perfection of form and percentage of double flowers. We offer them in the following colors: **Flesh color, pure white, red, bright rose, deep maroon, sulphur yellow.**

Price, 20 cts. each; \$2 per doz.; \$12 per 100.

Set of 6 varieties for \$1.

Mammoth Allegheny Hollyhock. A grand flower, seldom less than 4 inches in diameter and of very transparent texture. Price, strong plants, 20 cts. each; \$2 doz.

Single Assorted Hollyhocks. A fine assortment of the showy single varieties with large flowers. Price, strong plants, 15 cts. each; \$1.50 doz.

HARDY PHLOX

Price 15 cts. each; \$1.50 per doz. Set of 10 varieties, \$2.

Andreas Hoffer. One of the earliest pure white varieties.

Boule de Feu. A bright vivid scarlet. One of the best of its color.

Coquelicot. Fine pure scarlet with deep carmine eye. A very beautiful sort.

Eclairer. A deep carmine rose with lighter centre. Very early and continuous bloomer.

Independence. Large pure white flowers in pyramidal heads. Of medium height and very fine.

Jeanne d'Arc. A late flowering, pure white.

Le Pole Nord. White with crimson eye. One of the best tall late blooming varieties.

Le Soleil. A beautiful soft rose shaded pink. Continuous bloomer through July, August and Sept.

Mad. Meuret. Flame color changing to rich salmon. One of the best.

Pantheon. Deep salmon rose. A very beautiful sort.

Richard Wallace. Tall white flowers with violet red centre.

Saison's Lierval. Large white flowers with deep rose eye. Very vigorous.

Oriental Poppy

General List of Hardy Perennials

Price of following except where noted 15 cts. each; \$1.50 per doz. By express only, purchaser paying transit.

- Achillea, "The Pearl."** Flowers pure white, double. June to September. 2½ feet.
- Aconitum Album.** Excellent border plants for shrubbery. Flowers white, 3 to 4 feet.
- Aconitum Napellus.** Dark blue. June. 3½ feet.
- Agrostemma Coronaria.** Flowers are crimson, blooming during June, July and August. 2 feet.
- Anemone Japonica.** See page 30.
- Anthem. Kelwayii.** Deep yellow flowers. Blooms from June to August. Height 2 to 3 feet.
- Aquilegia, Cærulea Blue.** Bright blue flowers. April to June. Height about 3 feet.
- Aquilegia Chrysantha.** Pure golden yellow with extra long spurs. May to August. Height 3 feet.
- Aquilegia, Double White.**
- Arabis Alpinus.** White. Early spring. 6 inches.
- Armeria Formosa.** Deep crimson. All summer.
- Armeria Maritima.** Fine purple flowers. 9 inches.
- Artemisia Dracunculus, Tarragon Root.** Valued for the fragrance of leaves. 20 cts. ea.; \$2.00 per doz.
- Asclepias Tuberosa.** Flowers are bright orange. June and July. 2½ feet.
- Aster Alpinus, luc.** A fine dwarf growing variety. 1 foot. May and June.
- Aster Perennial in Variety.** See page 30.
- Aubretia Deltoidea.** Flowers in early spring, Purple. 3 to 4 inches.
- Baptisia Australis.** Dark blue. July. 2 feet.
- Bocconia Japonica.** 6 to 8 feet high. White.
- Boltonia Latifolium.** Clear lavender flowers. August and September. Height 4 feet.
- Campanula Carpatia.** Dwarf with blue bell-shaped flowers. 9 inches. June to September.
- " " **Alba.** Pure white.
- " **Grandiflora.** See Wahlenbergia.
- " **Macrantha.** 3 to 4 feet high. Very large dark blue flowers throughout the summer.
- " **Persicifolia.** Large purple flowers during June and July. 3 feet.
- " **Persicifolia Alba.** A pure white form of above. Very handsome border plant.
- Campanula Calycanthema.** (Cup and saucer.) Blue, white and rose.
- Canterbury Bells.** June and July to a height of 2½ to 3 feet. Flowers large, bell shaped.
- Each of the following, 15 cts. each; \$1.50 per doz., \$10.00 per 100.
- | | | |
|---------------------------------|---|--------------|
| Double Assorted | Single Lavender | Single Mauve |
| Single Blue | Single White | Single Rose. |
| Centaurea Macrocephalus. | 3 feet high. Deep yellow. | |
| Centaurea Montana. | Purple. September. 18 inches. | |
| Chelone Barbatu Torreyi. | Bright scarlet. July. 4 ft. | |
| Coreopsis Lanceolata. | Flowers are golden yellow and 3 in. in diameter. June till frost. 2½ feet high. | |

Aquilegia

- Crucifera Stylosa.** Pink flowers June to Sept.
- Delphinium.** See page 31.
- Dicentra Spectabilis.** "Bleeding Heart." Blooms in spring. Bright pink heart-shaped flowers. 3 feet.
- Dicentrus Fraxinella.** Spikes of red flowers. 3 feet. May and June. 20 cts. each; \$2.00 per doz.
- Dicentrus Fraxinella Alba.** White. 20 cts. each; \$2.00 per doz.
- Digitalis Purpurea.** Foxglove. 2 to 3 feet. June and July.
- " " **Alba.** White.
- " " **Rosea.** Pink.
- " **Gloxyniflora.** Lavender.
- " " White.
- " " Pink.
- " **Monstrosa.**

Doronicum Plantagineum Excelsum. Yellow. Spring to fall.

Dracopcephalum Austricum. Dark blue. 2 feet. June and July. 20 cts. each; \$2.00 per doz.

Echinops Ritro. Globe Thistle. Blue. July and August. 3 feet. 20 cts. each; \$2.00 per doz.

Gaillardia Grandiflora. Ray flowers varying from yellow to red. 3 feet. June to frost. \$10.00 per 100.

Glaucium Luteum. Bright yellow flowers. July.

Gypsophila Paniculata. "Baby's Breath." Small white flowers during the summer. 3 ft. \$10.00 per 100.

Helenium Bigelovi. In bloom throughout the summer. Bright yellow with an almost black centre.

Helenium Autumnale Superbum. A magnificent yellow perennial. Blooms all summer. 6 feet.

Helianthus Rigidus. Orange yellow. August to October. 4 feet.

Heliopsis Pitcheriana. Deep orange yellow. All summer. 3 feet.

Gaillardia Grandiflora

GENERAL LIST OF HARDY PERENNIALS—Cont.

Pyrethrum

Phlox Decussata (Hardy Phlox). See page 31.
Phlox Divaricata. Lavender blue. May and June.
Phlox Subulata Alba. White. The best of all the dwarf-growing perennials for early blooming.
Phlox Subulata Rosea. Small pink flowers. Dwarf.
Physostegia Virginica Alba. White flowers. 4 ft.
Platycodon. See Wahlenbergia.
Polemonium Richardsonii. Bright blue. 1 ft.
Potentilla Formosa. Charming rosy red flowers produced in profusion from June to August.
Poppy Oriental and Naudicaule. See page 31.
Pyrethrum Roseum Hybridum. Flowers aster-like in form and giving a continuity of bloom throughout the summer time.
 Double White Double Pink Single White Single Pink
 " Red " As't'd " Red " As't'd
Price of above 15 cts. each; \$1.50 per doz.; \$10 per 100.

Pyrethrum Uliginosum. Bears hundreds of single white flowers till killed by frost. 5 ft.
Rudbeckia, Golden Glow. Flowers are a beautiful golden yellow and perfectly double. 6 ft. 15 cts. each; \$1.25 per doz.; \$8.00 per 100.
Scabiosa Caucasia. Flowers are a pale lilac and are borne continually through the summer. 18 in.
Scabiosa Caucasia Alba. White.
Sedum Hybridum. Handsome summer flowering perennial with broad heads of yellow flowers.
Shasta Daisy. Flowers large, with three or more rows of petals of pure paper white. 2½ ft.
Silene Saxifraga. Fine early flowering perennial. Flowers pure white and lasting a long time.
Spiraea Aruncus. Immense branched panicles of small creamy white flowers. 25 cts.; \$2.50 per doz.
Spiraea Palmata. Vivid crimson flowers. June, July and August. 3 ft. 25 cts. each; \$2.50 per doz.
Stachys Lanata. Silvery foliage, spikes of purple flowers in July. 2 ft.
Stokesia Cyanea. Lavender blue in autumn. 1 ft.
Sweet William. Assorted. 10 cts. each; \$1.00 doz.
Sweet William Nigricans. Dark red. 10 cts. each; \$1.00 per doz.
Sweet William. Pure White. 10 cts. each; \$1 per doz.
Thalictrum Glaucum. Bright yellow flowers.
Tritoma Uvaria. "Red Hot Poker" Orange red spike of flowers. Blooms in August. 3 ft.
Trollius Japonica. A handsome yellow flowering perennial with large globular flowers. June.
Veronica Spicata. Long spikes of small blue flowers. June to August. 2 ft. 20 cts. each; \$2.00 per doz.
Veronica Spicata Alba. A very showy white form of above variety. 20 cts. each; \$2.00 per doz.
Veronica Candida. Grayish white foliage with blue flowers during July and August. Grows about 2 ft.
Viola Cornuta Alba. Tufted Pansy. White flowers from April to August. 9 in. high.
Wahlenbergia Grandiflora. Bell-shaped flowers; pretty blue shade; bloom from July to September.
Wahlenbergia Alba. A white flowering form.

Hemerocallis Aurantiaca Major. Large, trumpet-shaped, fragrant flowers of a deep orange shade. July and August. 35 cts. each; \$3.50 per doz.
Hemerocallis Flava. Flowers very large and double and terracotta in color. 3 ft. May and June.
Hibiscus. Crimson Eye. White flowers having a crimson purple eye. August. 4 ft.
Hibiscus. Militaris. Pink, with crimson centre. August. 5 ft.
Hibiscus. Moscheutos. Swamp mallow. Beautiful large pink flowers during July and August. 4 ft.
Hieracium Aurantiacum. Orange red. June and July.
Hollyhocks. See page 31.
Iberis Sempervirens. A pure white perennial Candy-tuft, flowering in flat heads during April and May.
Incarvillea Delavayi. Flowers large, rose colored. 2 ft. 20 cts. each; \$2.00 per doz.
Lathyrus Latifolius. The Ever-lasting Pea. Blooms throughout the summer. Red, white and pink.
Lily of the Valley. Large clumps. 25 cts. each; \$2.50 per doz.
Linum Perenne. Handsome light blue flowers. June to Oct. 18 in.
Lobelia Cardinalis. Deep scarlet. August and Sept. 3 to 4 ft. 20 cts. each; \$2.00 per doz.
Lupinus Polyphyllus. Deep blue. June to October. 3 ft.
Lupinus Polyphyllus Albus. A white form of above.
Lychnis Chalcedonica. Brilliant scarlet. June to August. 4 ft.
Lychnis Haageana. Brilliant orange scarlet flowers nearly 2 in. across. July and August. 1 to 1½ ft.
Lythrum Roseum Superbum. Rosy red flowers during the summer months. 2 to 3 ft.
Monarda Didyma. Brilliant scarlet. 2 to 3 ft.
Myosotis Palustris Semperflorens. May till frost. Bright blue. 6 in. 10 cts. each; \$1.00 per doz.
Oenothera Frazeri. Flowers are yellow. June to August. 3 to 4 ft.
Penstemon. See Chelone.

Shasta Daisy.

HARDY ORNAMENTAL SHRUBS

SUITABLE FOR FALL PLANTING

READY ABOUT OCTOBER 15

Color, Time of Flowering and Height Given After Each Variety

- Althea, Rose of Sharon.**
 " **Double White.** August and September, 35 cts. each.
 " **Red.** August and September, 35 cts. each.
 " **Variegated.** August and September, 50 cts. each.
Azalea Mollis. Yellow, orange and rose. Spring. 2 feet, 50 cts. each; \$5.00 per doz.
Azalea Ghent. Yellow, orange, rose and red. Spring. 2 to 3 feet, \$1.00 each; \$9.00 per doz.
Berberis Purpurea. Purple foliage. 15 to 30 cts. each.
Calycanthus Floridus. Chocolate colored. All summer. 4 feet, 35 and 50 cts. each.
Clethra Alnifolia. Pure white, very fragrant. 35 cts. each.
Cornus Sericea. Silky cornel. 5 to 8 feet, 35 and 50 cts. each.
Cytisus Laburnum. Low bush with dark foliage and clusters of purple and white pea shaped flowers in summer. 35 cts. each.
Desmodium Penduliflorum. Red pea blossoms. September and October. 4 feet, 35 cts. each.

Viburnum Tomentosum. Single snowball. Late summer, 50 cts. each.
Weigelia Candida. 5 to 6 feet, 25 and 50 cts. each.
Weigelia Rosca. Pink. May and June. 25 and 60 cts.
Weigelia Crimson. July. 25 and 50 cts. each.
White Fringe Tree. 35 and 50 cts. each.

- Euonymus Europaeus.** Burning bush. Fruit scarlet. June. 10 feet, 35 cts. each.
Forsythia Fortunei. Yellow. Early spring. 8 feet, 25 and 50 cts. each.
Golden Elder. One of the finest golden-leaved shrubs. 35 and 50 cts. each.
Hardy Hydrangea. Paniculata Grandiflora. The most popular hardy shrub. Pure white.
Strong 2-Year-Old Plants, 25 cts. Each; \$2.50 Doz.
Extra Selected 3 and 4 Years Old, 50 cts. to \$1.50 Each.
Hydrangea Tree. 75 cts. each.
Hypericum Aureum. Yellow flowering. From midsummer till fall. 35 and 50 cts. each.
Japan Quince. Scarlet. Early spring. 6 feet, 25 and 50 cts. each.
Kerria Japonica Variegata. All summer 4 feet, 35 cts. each.
Kerria Japonica, Double. Yellow. All summer. 4 feet, 35 cts.
Kerria Japonica, Single. Yellow. 35 cts. each.
Lilac Purple. May. 35 and 50 cts. each.
 " **White.** 35 and 50 cts. each.
 " **Rubra de Marley.** Purplish red. 50 c. ea.
Prunus Pissardi. The purple-leaved plum. Handsome foliage. Height 10 feet, 50 cts. each.
Rhus Cotinus. Smoke Tree. 35 and 50 cts. each.
Ribes Aureum. Flowering currant. 35 and 50 cts. each.

Hardy Hydrangea

HARDY CLIMBING VINES

CLEMATIS

Paniculata. Best of all the late summer or fall blooming clematis. Flowers small, pure white and borne in panicles. Quite fragrant.

Strong plants 50 cts. each; \$5.00 per doz.

Extra strong plants, 75 cts. and \$1.00 each.
Jackmani. Flowers very large of a deep violet purple. **Strong plants 50 cts. each; \$5.00 per doz.**

Alba. A white flowering form of above. 50 cts. each.

Duchess of Edinburgh. Purest double white. Very sweet scented. 50 cts. each.

Gypsy Queen. Large dark velvety purple flowers, borne late. 50 cts. each.

M. Koster. Beautiful large rosy carmine flowers; at their best in September. 50 cts. each.

Ramona. Lavender blue. Free flowering. 50 cts. ea.

AMPELOPSIS Veitchi. The Boston Ivy. Leaves a bright green turning to various brilliant colors in autumn. 25 cts. each; \$2.50 per doz.

Quinquefolia. Common Woodbine. Very vigorous. 25 cts. each; \$2.50 per doz.

BIGNONIA Radicans. Trumpet vine, scarlet flowers. 35 cts. each.

BITTER Sweet. Large glossy leaves with clusters of orange red fruit. 35 cts. each.

HONEYSUCKLE Belgica. Fragrant red and yellow flowers all summer. 35 cts. each.

Halleana. Fragrant yellow and white flowers throughout the summer. 25 cts. each.

Japan Golden Variegated. Leaves variegated green and gold. 35 cts. ea.

Scarlet Trumpet. Scarlet tubular flowers borne freely through the summer. 35 cts. each.

MATRIMONY Vine. Bears transparent brilliant crimson berries. 35 cts. each.

WISTARIA Chinese Blue. Grape-like clusters of pale blue flowers. 50 cts. each.

Mulytriga. Dark purple flowers in extra long racemes. 75 cts. each.

Clematis Paniculata

HEDGE PLANTS

We do not give a long list of Hedge plants, but catalogue a few kinds which we have selected as the most desirable.

California Privet. Unsurpassed for hedges. The foliage is a handsome shade of deep green and almost evergreen. Leaves are oval shaped and of medium size. **Price, 18 to 24 inches high, doz. \$4.00; 100, \$6.00; 2 to 3 feet high, doz. \$1.50; 100, \$8.00; 3 to 4 feet high, doz., \$2.00; 100, \$12.00.**

Berberis Thunbergii. One of the best low growing hedge plants, attaining a height of about 3 feet. Leaves small and oval, dark shiny green. **Price, strong 2-year-old plants, \$2.00 doz.; 100, \$12.00. Extra strong 3-year-old plants, doz., \$3.00; 100, \$18.00.**

Rosa Rugosa. A superb hedge plant where both foliage and flowers are desired. We have both the red and white varieties. **Price, strong 2-year-old plants, \$3.00 doz.; 100, \$30.00.**

HARDY GRAPES

BLACK VARIETIES

Concord. Very large bunch, bearing good sized berries. Bears in September. 20 cts. each; \$2.00 per doz.; extra size, 35 cts. each.

Isabella. Compact bunch of large berries, tender and of excellent quality. 25 cts. each; extra size, 40 cts. each.

Moore's Early. Resembles the Concord, but ripens nearly two weeks earlier. 30 cts. each; \$3.00 per doz.; extra size, 50 cts. each.

Worden. Thin-skinned berries, borne in a compact bunch. 25 cts. each; extra size, 40 cts. each.

Plants shipped by express only. Pot-grown plants in September 50 cts. per doz.; \$1.50 per 50; \$2.50 per 100; except where noted.

Layer plants, ready September 15, 25 cts. per doz.; \$1.00 per 100; \$7.00 per 1000, except where noted.

Not less than 50 at 100 rate
" " " 500 " 1000 "

Marshall. Extra large. Deep red midseason.

RED VARIETIES

Brighton. Thin-skinned berries with tender flesh. 25 cts. each.

Catawba. Very prolific. Long bunches of medium sized fruit. 25 cts. each; extra size, 40 cts. each.

Delaware. One of the sweetest grapes. Berries very small. 25 cts. each; extra size, 40 cts. each.

WHITE VARIETIES

Green Mountain. Greenish white berries, thin skin and very tender. 50 cts. each; extra size, 75 cts. each.

Niagara. Handsome bunches of berries of the finest flavor. 25 cts. each; extra size, 40 cts. each.

Pocklington. Large berries covered with white bloom. 25 cts. each.

Commonwealth. New late variety. Dark solid fruit. **Layer plants \$2.00 per 100; pot-grown, \$5.00 per 100.**

Belmont. Oblong berry. Fine late sort.

Brandywine. Glossy crimson. Very hardy and productive.

Clyde. Bright scarlet. One of the best all-round varieties.

Glen Mary. One of the best for yield and quality.

Sample. P. More generally grown for market than any other. Very firm crimson fruit.

Cucumber—Rawson's Hot-House

This is the result of repeated selections from our stock of White Spine Forcing which has resulted in a cucumber about two inches longer than the old variety; otherwise the same shape but a *darker green in color*. We believe that we now have the finest strain of hot-house forcing cucumber that is grown. The specimens for seed stock have been very carefully selected from vines saved in our greenhouse in early winter especially for this purpose, where nothing was allowed to grow on the vines excepting the cucumbers saved for seed stock and selected personally by Mr. Rawson.

COLOR
DARK GREEN
WITH SLIGHT
WHITE SPINE
AT END

The fruit grows very even in size and regular in form: color a very dark green, a few light spines showing at blossom end. In recommending this new strain, "Rawson's Hot-house Cucumber," for forcing it is not just testing in small quantities but from practical experience, as all of our houses at Arlington are growing cucumbers of this strain. **Pkt., 25 cts.; ½ oz., 60 cts.; 1 oz., \$1.00; 2 oz., \$1.75; ¼ lb., \$2.50; ½ lb., \$4.00.**

SIZE
TWO INCHES
LONGER THAN
RAWSON'S
WHITE SPINE

CUCUMBER—RAWSON'S WHITE SPINE. A superior forcing variety; color, dark green; seed stock saved from specimens grown in our greenhouses at Arlington. We have taken particular pains in selecting the specimens for seed stock from vines saved in our greenhouse. Fruit grows very even in size, regular in form. Color is dark green, white or light spines running from blossom end. We recommend this for forcing, not from mere test, but from practical experience, as we grow cucumbers in large quantities for Boston and New York markets. **Pkt., 10 cts.; ½ oz., 25 cts.; oz., 40 cts.; 2 oz., 70 cts.; ¼ lb., \$1.00.**

LETTUCE—RAWSON'S HOT-HOUSE

(ARLINGTON SEED)

The largest plain leaf Lettuce grown. A favorite with market gardeners.—For inside culture only. This new lettuce is especially adapted for growing in greenhouses and hot-beds, being nearly double the size of the famous Boston Market, or White-Seeded Tennis-Ball

Lettuce. It is also a sure header, and not liable to rot in the heart, making it a most valuable sort for market gardeners. This is now the leading variety for forcing grown for Boston markets. **Pkt., 10 cts.; ½ oz., 25 cts.; oz., 40 cts.; 2 oz., 70 cts.; ¼ lb., \$1.10; ½ lb., \$1.00.**

LETTUCE—RAWSON'S CRUMPLED LEAF

The largest Lettuce grown. The best for shipping. A sure header.—Rawson's Crumpled Leaf Lettuce forms a fine large, solid head with leaves of very dark green, slightly ruffled or crumpled, very tender, and flavor unsurpassed. For so large a variety it is a

quick grower, sure to head, and decaying in the heart almost unknown. Will easily pack three dozen to a barrel box, and should be set at least 8 inches apart. **Pkt., 10 cts.; ½ oz., 25 cts.; oz., 40 cts.; 2 oz., 70 cts.; ¼ lb., \$1.10; ½ lb., \$1.00.**

RADISH—SCARLET CONICAL

THE MARKET GARDENER'S FORCING RADISH

This excellent strain is now more used by our customers than any other variety

It is a great improvement over the old variety of Scarlet Globe or Cardinal. In color it is a brilliant scarlet, in flavor it is mild, crisp, juicy and tender. It forms a small top and will stand a great amount of heat without becoming pithy. For forcing in greenhouses, hot-beds or

cold frames and for sowing early out of doors there is no other variety that will pay better, as its very attractive color, handsome shape and fine qualities will command a higher price and a more ready sale. **Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 25 cts.; ½ lb., 75 cts.**

BEEF—CROSBY'S IMPROVED EGYPTIAN

The finest Beet for growing in Greenhouse, or first early in open ground

This variety, well known by our Arlington gardeners, is the result of repeated and careful selection for a series of years by the late Mr. Josiah Crosby, of Arlington, Mass., from his stock of the original Egyptian Beet. By his method he succeeded not only in producing a variety that was better in form, being thicker and smoother, or

even in growth, but better in quality than the older sort. It is also equally early. **Arlington Grown Seed, pkt., 5 cts.; oz., 10 cts.; 2 oz., 15 cts.; ¼ lb., 30 cts.; ½ lb., \$1.00. New England Grown, pkt., 5 cts.; oz., 10 cts.; ¼ lb., 20 cts.; ½ lb., 60 cts.**

POULTRY SUPPLIES

Catalogue of Incubators and Brooders Sent on Application

Animal Meal. A specially prepared egg-producing food for fowl. Made from fresh meat and fresh bones. 5-lb. bags, 25 cts.; 10-lb. bags, 40 cts.; 25-lb. bags, 75 cts.; 50-lb. bags, \$1.25; 100-lb. bags, \$2.00.

American Poultry Food. Ground wheat, corn, oats and barley, kiln-roasted. 5-lb. bags, 25 cts.; 10-lb. bags, 40 cts.; 50-lb. bags, \$1.15; 100-lb. bags, \$2.00.

Beef Scraps. Prepared from carefully selected scraps, and ground to the proper fineness. 5 lbs., 25 cts.; 10 lbs., 40 cts.; 25 lbs., 75 cts.; 50 lbs., \$1.25; 100 lbs., \$2.50.

FERTILIZERS

PURE SHEEP MANURE

Direct from the Corrals in the West

CANADIAN UNLEACHED WOOD ASHES.

Good Hardwood Unleached Ashes, from first growth timber grown on strong land, the soil of which is rich in potash, lime, phosphoric acid, silica, magnesia and iron. They give to the grass a rich, dark shade of green, and will destroy many of the insects which are injurious to grass roots. **Superior for lawns.** 100-lb. bag \$1; per bbl. \$2; ton \$17. Carload lots on application.

BOWKER'S HILL AND DRILL PHOSPHATE is a concentrated general fertilizer. 100-lb. bags \$1.80; per ton, ask for special price.

RAWSON'S LAWN AND GARDEN DRESSING. For lawns, grass plots, kitchen gardens and flower beds. This superior dressing is made from chemicals, and is so prepared that it acts gradually throughout the season, producing a luxuriant growth of grass of a rich green color. It is far superior to lumpy, strawy manure, which disfigures the lawn and gives off an offensive odor. It is less expensive than manure, is nearly odorless, and is easily applied. It may be applied at any time during the spring, summer or autumn, or as often as the grass seems to need nourishment. It is also an excellent fertilizer for the kitchen garden, and may be used on all garden crops, vegetables, fruits, flowers, etc., in place of stable manure. 10-lb. bags 50 cts.; 25-lb. bags \$1; 50-lbs. \$1.75; 100 lbs. \$3.00.

BOWKER PLANT FOOD. It is made expressly for flowers grown in house or garden. It produces a healthy growth and early flowering. Pkt. 15 cts. and 25 cts.; by mail, 25 cts. and 45 cts.

FERTI-FLORA. A liquid fertilizer for potted plants. No stronger solution of fertilizer elements can be maintained at winter temperature without using unsafe mineral acids. Per bottle 25 cts.; unavailable.

Received in carload lots. At Faneuil Hall Square we have a pulverizer run by power in which we pulverize, under our own supervision, all the sheep manure that we sell. *We know it is pure and fresh; we grind nearly every day.* Our customers are invited to go with us to the top floor of building and see how it is done.

This is a pure, natural manure, and the most nutritious food for plants. Its effect is immediate, much more lasting and healthy than guano or any other manure. It is the best of all manures for mixing with the soil for greenhouse plants. It makes the quickest, safest and richest liquid manure, rivaling guano without any deleterious effect. Excellent for flower or vegetable gardens. **As a top dressing for lawns it is unequalled.** 100 pounds is sufficient for 2,000 feet of lawn. For use with **PLANTS IN POTS FOR HOUSE.**

Directions. For mixing with soil take one part manure to six parts soil. For making a liquid, take one pound manure to five gallons water, which can be used with safety daily if necessary.

Price, package 10 cts.; 5-lb. package 25 cts.; 10-lb. package 40 cts.; 100-lb. bag \$2.00; per ton \$35.

PURE FRESH GROUND BONE.

100-lb. bags \$1.75. **GRAPE, OR ORCH BONE.** For grape vines, fruit trees, shrubs and trees of all kinds. Price, in bags or barrels, 2½ cts. per lb.

FLOUR OF BONE ground very fine. An excellent fertilizer for pot plants or beds where immediate results are needed. 5 lbs. 25 cts.; 10 lbs. 40 cts.; 25 lbs. 75 cts.; 50 lbs. \$1.25; 100 lbs. \$2.

MURIATE OF POTASH. 80 to 85 per cent. 100 lbs. \$2.50; per ton, ask for special price.

SULPHATE OF POTASH. 100 lbs. \$1.75; per ton, ask for special price.

NITRATE OF SODA. 95 to 98 per cent. purity. 5 lbs. 30 cts.; 10 lbs. 50 cts.; 100 lbs. \$3.00.

SULPHATE OF AMMONIA (Best). 24¾ to 25¼ per cent. ammonia. 10 lbs. 60 cts.; 100 lbs. \$3.75.

STERILIZED POTTING SOIL. This soil is from our greenhouses in Arlington and the same as we use in growing of all our plants. ½ pk. 20 cts.; pk. 30 cts.; bush, \$1; bbl. \$2.

ROTTED FIBROUS PEAT. Having constant demands for rotted peat from many of our customers who want it to mix with other soils for use in potted plants, we have secured a quantity of the finest fibrous peat, which has become thoroughly rotted, and is invaluable for potted plants. ½ pk. 20 cts.; pk. 30 cts.; bush, \$1; bbl. \$2.

LEAF MOULD. Is very essential for growing plants. ¼ pk. 20 cts.; pk. 30 cts.; bush, \$1; bbl. \$2.

ORCHID PEAT, OR FERN ROOT. Bbl. \$2.75; bush, \$1.50.

SPHAGNUM MOSS. We can furnish at most any time of year, freshly gathered or dry. Bbl. \$1.50; bush, 75 cts.

INSECTICIDES

Aphis Punk is lighted with a match and allowed to burn, which it does without flaming, at the same time giving off dense white fumes of nicotine that kills aphids and thrip very effectively. A box contains one dozen rolls, each containing 60 grains of nicotine—sufficient for fumigating 600 feet of floor space in houses of ordinary height. 60 cts. per box.

Bordeaux Mixture. Liquid, qt. 40 cts.; gal. \$1; dry, lb. 15 cts.

Cresote Mixture. This mixture is sure death to the eggs of the Gypsy Moth, Tussock Moth, and similar insects, recommended by the Massachusetts Gypsy Moth Committee. Qt. cans, 25 cts.; gal. cans, 60 cts.

Fir Tree Oil. A vegetable oil for destroying insects by contact, and of especial value to the handler because of its harmlessness. Recommended for destroying the mealy bug, red spider, scale thrips and green fly, and highly valued as a wash for domestic pets. ½ pt. 40 cts.; pt. 75 cts.; qt. \$1.25; ½ gal. \$2.25; gal. \$4.25.

Kerosene Emulsion. For lice, scale insects and most soft-bodied insects. Valuable for washing domestic pets. Qt. 35 cts.; gal. 90 cts.

Lemon Oil. Destroys all insects on the foliage and roots of plants without injury to the flowers or leaves. An excellent wash for dogs, curing mange. ½ pt. 25 cts.; pt. 40 cts.; qt. 75 cts.; ½ gal. \$1.25; gal. \$2.

Nico-Fume. A Tobacco Paper for fumigating greenhouses; does not injure blooms. Send for circular. Cans of 24 sheets 75 cts.; 144 sheets \$3.50; 288 sheets \$6.50.

Nicotide. For destroying green and black fly, thrip, mealy bug, red spider, etc. In cans.

No. 1	containing 1 pt., sufficient for 32,000 cubic ft.,	\$2.50
No. 2	" " ½ " " " " 16,000 " " "	1.25
No. 3	" " 4 oz., " " " " 8,000 " " "	.75

Fumigators for using the same, 50 cts.

Nikotene is used either by fumigating or spraying.

Pint bottle \$1.50.

Rose-Leaf Extract of Tobacco. A very strong extract of tobacco and highly recommended for use in greenhouses. Pt. 30 cts.; qt. 45 cts.; gal. \$1.25; 5 gals. \$5.

Soap, Sulpho Tobacco. The most convenient form of tobacco as an insecticide for general use. 3-oz. pkg. 10 cts.; ½ lb. 20 cts.

Soap, Whale Oil. ½ lb. box, 10 cts.; lb. 15 cts.; 5 lbs. 50 cts.; 10 lbs. 90 cts.

To-bac-line Fumigating Paper is an especially prepared paper thoroughly saturated with pure nicotine, making a most powerful insecticide and harmless to the most delicate flower or plant. Boxes of 12 rolls, 60 cts.; case of 12 boxes \$6.50.

To-bac-line Fumigating Powder. Where a slow and long fumigating is desirable this powder is especially adapted. 50-lb. bags \$1.50; 100-lb. bags \$3.

To-bac-line Liquid is a concentrated solution of pure nicotine for spraying or vaporizing. ¼ pt. can 60 cts.; ½ pt. can \$1.10; 1 pt. can \$2; 1 gal. can \$15.

Tobacco Dust. Valued as an insecticide and fertilizer. Sure preventive for green fly, and better as a mulch than the stems. Lb. 10 cts.; 5 lbs. 20 cts.; 100 lbs. \$2.50.

Tobacco Stems. For fumigating. Valuable as a mulch for rose beds, sweet peas and other plants. Bbl. \$1; bale \$1.50.

WOULD YOU PICK A PLUM?

\$1.00

WE HAVE ARRANGED,

\$1.00

in conjunction with Doubleday, Page & Company, the publishers of the new **Garden Magazine**, now acknowledged to be the representative American gardening periodical, to offer this One Dollar publication for six months (including special and double numbers) and the most helpful and up-to-date book on **How to Plan the Home Grounds**, by Samuel Parsons, Jr. (One Dollar edition in cloth), to our customers, postpaid, for a very low sum. We can say but a few words in this limited space about the magazine and book. The former is an *up-to-date encyclopedia of gardening*. The latter is a complete general guide to planting. Together, we believe they are absolutely the largest value worth any gardener or home-builder could buy. They are sold separately everywhere at full price. Our customers get them both for \$1.00 if they speak now. You will certainly, sooner or later, buy the book or the magazine. Why not take advantage of this greatly reduced price?

THE GARDEN MAGAZINE is already too well known to require a description on this page. It is by far the most beautiful, helpful and readable periodical on gardening. It will be even larger and better for the coming year, a constant reminder and guide for the growing of flowers, vegetables and fruits, in many superbly illustrated articles and twenty-five regular departments. We can only suggest two of the twelve timely numbers.

FALL PLANTING NUMBER (ready September 15th). Millions of dollars are spent each year, when autumn comes around, for bulbs, hardy plants and trees. More and more expert gardeners plant in the fall. *Hardy plants and bulbs put carefully into the ground in the fall are ready to take advantage of the early spring season, and get vastly better results.*

DOUBLE NUMBER

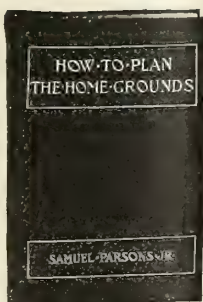

For April

With the pace set by the great Planting Number last April, it will easily be the most important and helpful garden publication of the year.

"Would not take \$50 for my April number if I could not get another," says one man who enjoys the pleasures of a good garden.

\$1.00 a year. 10c. a copy

CONTENTS: Selection of Home Grounds; Selection of a House Site; Roads and Paths; Lawns; Flower Gardens; The Terrace; Plantations; Deciduous Trees and Shrubs; Evergreen Trees and Shrubs; Hardy Herbaceous Plants; Aquatic Plants; Hardy Vines and Climbers; Bedding Plants; Pools and Streams; Woodlands; The Use of Rocks; Residential Parks; Fences, Bridges, and Summer Houses; Plants for General Use on Home Grounds; Contracts and Specifications; Parks and Parkways; Churchyards and Cemeteries; Seaside Lawns; City and Village Squares; Railroad and Station Grounds.

HOW TO PLAN THE HOME GROUNDS

Samuel Parsons, Jr., the author, is a Fellow of the Society of American Landscape Architects, and was for years Superintendent of the New York Parks. He gives practical directions not only for laying out the home grounds, selection of site, the care and making of roads and paths, lawns, woodlands, hedges, gardens, selection of plants and trees, etc., but also in a second section he treats of the village improvements, designed to elevate public taste, as it concerns the highways, the schoolhouses, the stations, and the village outdoor life generally.

Size, 5 x 7½; pages, 249; illustrations, 56; binding, cloth; price, net, \$1.00

Rawson's Arlington Lawn Grass

Is Made up of Extra Recleaned
Seeds of the Close-growing
Varieties

It is the Cleanest, the Best,
the Heaviest, the
Cheapest

We have taken special care that no light or slow-growing varieties be included in this mixture, so that when seed is sown, if the ground is in proper shape, it will start at once and in a few days look green. It will form a thick turf in a few weeks' time, has no tendency to stool or grow in clumps, as we have allowed no grasses of this nature to be in the mixture. It withstands the drought without turning brown, as the varieties selected are of deep rooting. ARLINGTON LAWN SEED will produce grass in a very short time of a beautiful deep green color, and retain the same during the season. The making of permanent lawns has required a great amount of experiments to obtain perfect satisfaction, and RAWSON'S ARLINGTON LAWN SEED is the result of our experiments; it has been tried in all kinds of soil and almost every condition, and we have yet to learn of the first unsatisfactory result obtained from sowing RAWSON'S ARLINGTON LAWN SEED, which being free from chaff starts at once before the weeds. This alone is worth more than the price of seed to any one seeding a new lawn.

It requires less seed to sow the lawn with ARLINGTON LAWN SEED. Being free from chaff, it starts at once, before the weeds.

1 qt. will sow	600 sq. ft.	: : \$0.30	4 qts. will sow	2,700 sq. ft.	: : \$1.00
2 qts. " "	1,300 " "	: : .55	8 " " "	5,400 " "	: : 2.00
2 bushels will sow one acre. Price per bushel, \$7.50.					

ARLINGTON LAWN SEED weighs from 30 to 32 lbs. to the bushel.

Regarding price, which may seem high, kindly take notice that Rawson's Arlington Lawn Seed weighs from 30 to 32 pounds to a bushel, while that put up by other seedsmen weighs from 14 to 20 pounds to the bushel.

RAWSON'S VELVET LAWN GRASS MIXTURE

This mixture has been sold by us for years and has always given satisfaction; it is composed of fine growing grasses. Many of these fine growing varieties, it is well known, have light seed, which is almost impossible to obtain free from some chaff, and is somewhat longer in germinating, but when once above ground, if properly managed, will produce a fine velvety lawn and permanent sod; weighs 16 lbs. to bushel.

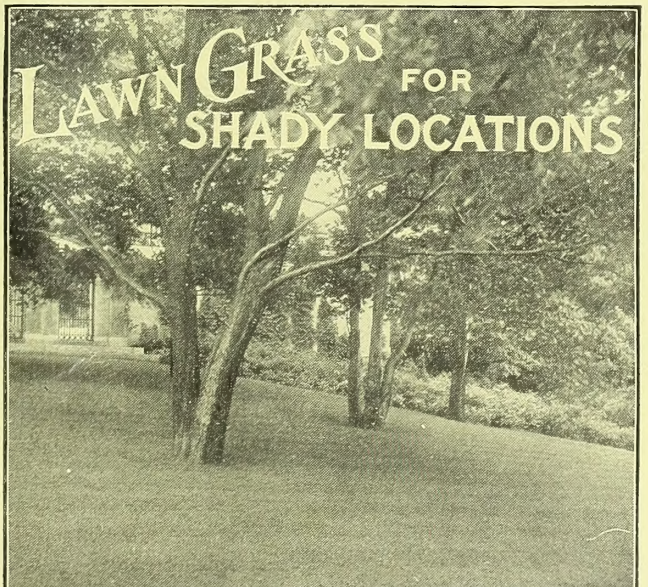

1 qt. will sow	300 sq. ft.	: : \$0.20	4 qts. will sow	1,350 sq. ft.	: : \$0.65
2 qts. " "	650 " "	: : .35	8 " " "	2,700 " "	: : 1.00
Sow 4 bush. or 64 lbs. to the acre. Price per bush. \$4.00.					

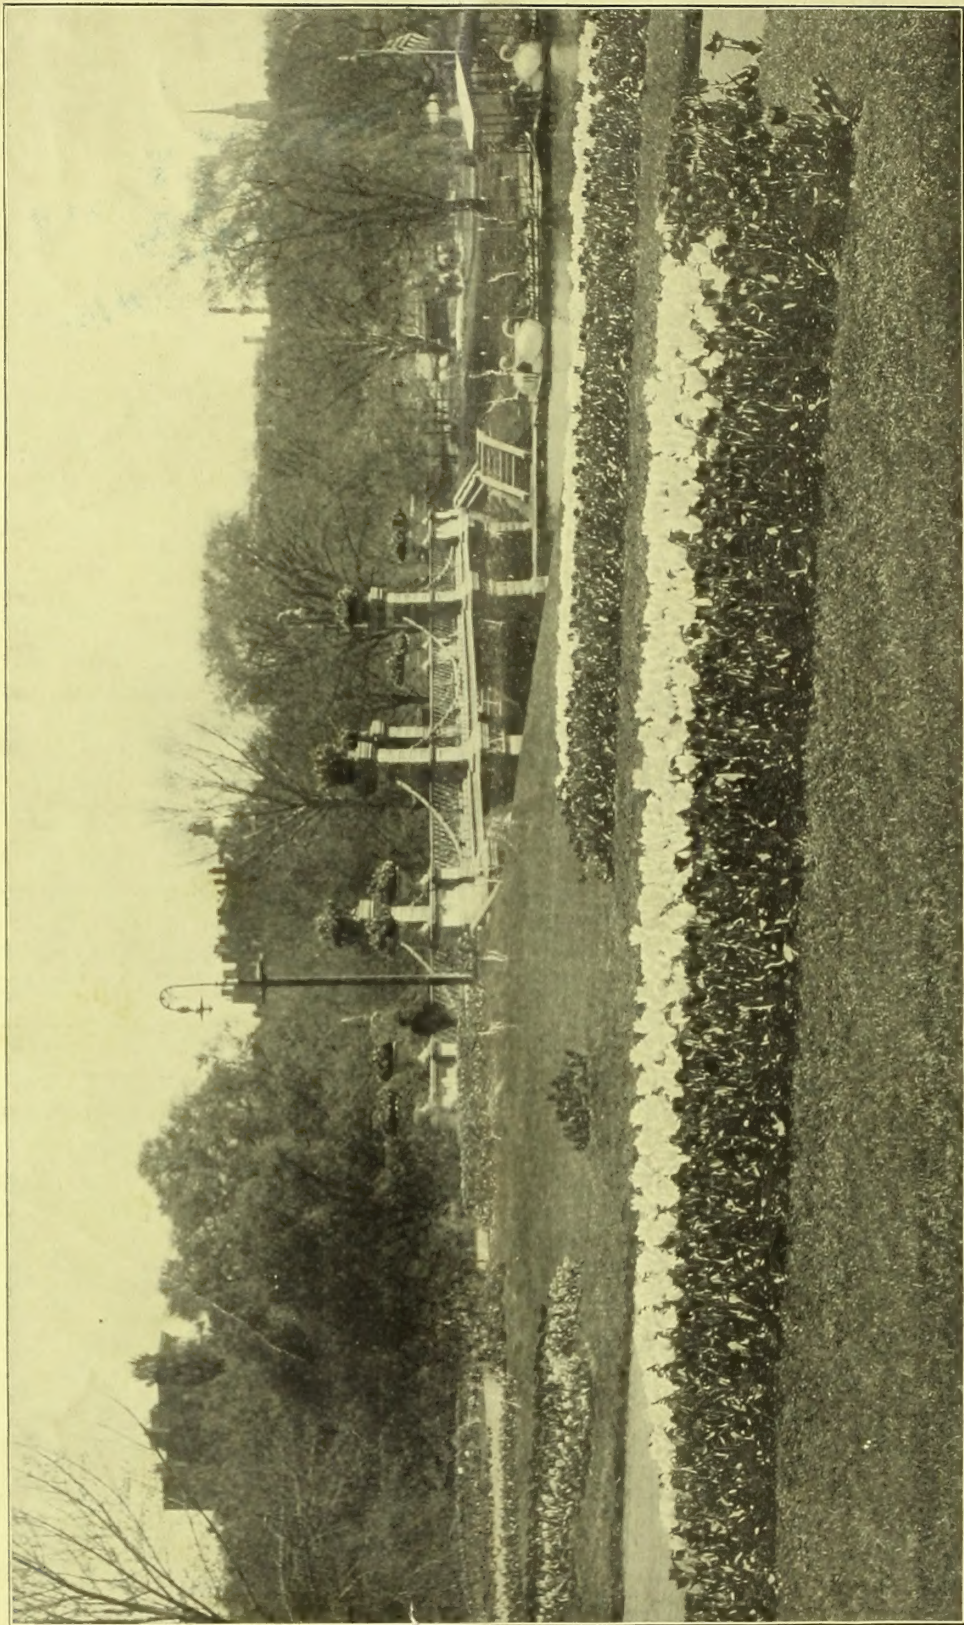

LAWN GRASS FOR SHADY LOCATIONS

A mixture especially adapted for growing in shady places where there is little or no sun. In many lawns there are trees which shade parts and sometimes nearly all the lawn, making it very unsightly at times. There is usually quite a little difficulty in obtaining satisfactory results in producing a lawn under these conditions. This mixture is for just such places; it combines the grasses which in their natural or wild state grow and mature their seed under these conditions. We have from practical experience made up this combination of grasses which will give good results where there is not too much shade and the soil is in good condition. If you find grass will not grow where this seed is planted then the soil is frequently found to be sour and needs an application of slacked lime, about one bushel to one thousand feet of lawn.

Qt. 25 cts.; 2 qts. 45 cts.; 4 qts. 85 cts.;
pk. \$1.50; bush. \$5.50.

A complete assortment of all kinds of grass seeds and clover for the farm, lawn or pasture at market prices. Full descriptions in our spring catalogue. Ask for prices.
